

Regulations Related to Bulk/Brush Collection

- Bulk items (furniture, appliances, boxes, bags, etc.) should not exceed a pickup truck load per collection.
- Brush piles can be no larger than a pickup truck load (6'x6'x6'). Brush can be no more than 12 inches in diameter and 6 feet in length. Small stumps of the same size (12 inches in diameter) or less that are free of dirt, rock, and other debris can also be collected.
- Place the materials at the curb no earlier than the Saturday before the collection day.
- No materials from contracted jobs or land-clearing will be collected.
- Small amounts of home-owner generated building material may be collected during bulk collection. The material must be no more than a 6'x6'x6' (a pickup truck load) and must not contain any roofing shingles, asphalt, brick, or concrete.
- Building materials include small amounts of lumber (less than three feet in length), wood from trim, paneling, small amounts of containerized drywall or ceiling tile, and PVC or galvanized pipe (less than three feet in length).
- Crossties will not be collected via bulk/brush collection.
- Landscape timbers that are no longer than 3 feet in length may be collected.
- Only four (4) tires, without the rims, per collection.
- Packing peanuts should be contained in a sealed box or sealed plastic bag to prevent the styrofoam from blowing around the street.
- Rugs/carpet should be rolled in lengths not to exceed 6 feet.
- Paint can only be collected if it is latex or water based and completely dried in can. Residents may mix sawdust, sand, or kitty litter with wet paint to aid in the drying process.
- Please either tape or wrap glass (mirrors, windows, shower doors) or break the glass ahead of time and double-bag the shards. This practice has two benefits: collectors avoid injury due to broken glass and glass shards that spray out of the truck do not lie in the road for vehicles to run over.
- Brush cuttings and tree limbs resulting from commercial tree trimming operations (contractor/commercial waste) will not be collected.
- Debris waste and tree stumps larger than 12 inches in diameter will not be collected.
- Grass clippings and leaves must be bagged.
- Any material that may be wind blown must be bagged.
- We cannot collect any bulk/brush from commercial establishments.
- We cannot collect dead animals or hazardous material.
- No individual piece or container may weigh more than 50 pounds.
